Note: Vehicles are homologated in accordance with the new type approval procedure WLTP (Regulation (EU) 2017/1151; Regulation (EU) /15/2007). From the 1st January 2021 CO<sub>2</sub> figures shown are derived solely from the WLTP test. NOTE: VRT Category N1 - Category A rate are those N1 vehicles that have 4 or more seats and in which the passenger and cargo/functional compartments are contained in a single unit. VRT Category B flat rate calculated as 13.3% of revenue's value of the vehicle. VRT Category C rate (€200) - only available to an N1 vehicle if it meets the following conditions: -1. classified N1 at all stages of manufacture 2. less than 4 seats at all stages of manufacture 3. technically permissible maximum laden mass (GVW) greater than 130% of the mass of the vehicle with bodywork in running order (MIRO) at any stage of manufacture (not the Actual Mass of the vehicle). If these three requirements are not met the vehicle will be either Category A or B depending on type.

Note: Where a vehicle is built as a multistage vehicle and converted, if the relevant vehicle weight as defined by the Revenue Commissioners for tax purposes exceeds the VRT requirements, the €200 VRT rate will not apply and the VRT will be calculated at the current rate of 13.3% of the open market selling price. Please note Ford will not be liable if there is an increase in the VRT rate. The VRT rate quoted in the price list above is calculated on a completed donor vehicle only.

Note: Vehicles are homologated in accordance with the new type approval procedure WLTP (Regulation (EU) 2017/1151; Regulation (EC) 715/2007). From the 1st January 2021 CO2 figures shown are derived solely from the WLTP test.

NOTE: VRT Category N1 - Category A rate are those N1 vehicles that have 4 or more seats and in which the passenger and cargo/functional compartments are contained in a single unit. VRT Category B flat rate calculated as 13.3% of revenue's value of the vehicle. VRT Category C rate (€200) - only available to an N1 vehicle if it meets the following conditions: -1. classified N1 at all stages of manufacture 2. less than 4 seats at all stages of manufacture 3. technically permissible maximum laden mass (GVW) greater than 130% of the mass of the vehicle with bodywork in running order (MIRO) at any stage of manufacture (not the Actual Mass of the vehicle). If these three requirements arent met the vehicle will be either Category A or B depending on type.

Note: Where a vehicle is built as a multistage vehicle and converted, if the relevant vehicle weight as defined by the Revenue Commissioners for tax purposes exceeds the VRT requirements, the €200 VRT rate will not apply and the VRT will be

FUEL CONSUMPTION & CO2

The test used to establish fuel consumption and CO2 figures has changed to deliver results that are more representative of real driving. The Worldwide Harmonised Light Vehicle Test Procedure (WLTP) has replaced the old NEDC test. The Fuel Consumption and CO2 figures shown are derived from the new WLTP test.

This will produce more accurate figures which most likely will be greater than those arrived at using the NEDC test. Please be mindful of this in making comparisons between vehicles where some manufacturers may still display the old NEDC figures. It should be noted that vehicle registration tax (VRT) and where applicable motor tax is now based on these WLTP figures from 1st January 2021. Understanding fuel data: The table below shows the fuel consumption (WLTP) and CO2 emissions (WLTP) for each available engine when fitted on a standard specification Focus (with no options or accessories). Adding options or accessories to your chosen vehicle can impact WLTP fuels consumption and CO2 emissions. Please speak to your Ford Dealer for more information.

You can also use Ford's online configurator to build and customise a new Ford vehicle: [www.ford.ie/configurator](http://www.ford.ie/configurator) . The configurator provides information about your configured vehicle's fuel consumption and CO2 emissions (these are also WLTP test figures).

Understanding fuel data The table shows the fuel consumption (WLTP) and CO2 emissions (WLTP) for each available engine when fitted on a standard specification Mondeo (with no options or accessories). Adding options or accessories to your chosen vehicle can impact WLTP fuels consumption and CO2 emissions. Please speak to your Ford Dealer for more information.

The fuel consumption you achieve in real life conditions and CO2 produced will depend upon a number of factors including options and accessories fitted, variations in weather, driving styles and vehicles load. The declared Fuel/Energy Consumption CO2 Emissions and Electric range are determined according to the technical requirements and specifications of the European Regulations (EC) 715/2007 and (EU) 2017/1151 as last amended. The applied standard test procedure enables comparison between different vehicle types and different manufacturers. In addition to the fuel efficiency of a car, driving behavior as well as other non-technical factors play a role in determining a car's fuel/energy consumption, CO2 emissions and electric range. CO2 is the main greenhouse gas responsible for global warming. This price list shows both original Ford accessories as well as a range of carefully selected products from third party suppliers, identified under that third party supplier's brand name.

Please note that third party supplier branded accessories do not come with a Ford warranty but are covered by the third party supplier's own warranty, the details of which can be obtained from your Ford Dealer.

Fitment of accessories may have an impact on your vehicle's fuel consumption.

Prices do not include fitting unless otherwise stated. Please refer to your Ford Dealer for fitted prices.

## OTHER PRICING CONSIDERATIONS

### Customer Order Price Protection

Ford's Price Protection Plan means that the price you pay is the same as the price on your order as long as you are prepared to accept delivery within three months, and in any event, as soon as your vehicle is available. Your Dealer has full details of the plan. Ford Motor Company Ltd is not liable for changes in price caused by Government changes in tax rates or changes in other applicable legislation.

### VAT

VAT is shown calculated at 23%. The total price of a vehicle, including factory fitted options and accessories fitted by the Ford Dealer, will be subject to VAT on retail sale.

### Price Changes

This price list outlines Ford's Recommended On The Road prices and Recommended Retail prices. Please contact your Ford Dealer for final sale prices. This price list is effective from 21 August 2023, and supercedes all previous price lists. The recommended prices in the publication were true and accurate at the time of printing. You should, however, check details with your Dealer as there may have been changes to Ford's recommended prices in view of Ford's policy of continuous development. Ford reserves its right to change its recommended prices at any time. Change to government legislation or tax changes could result in a change to Ford's published prices.

## ILLUSTRATIONS, DESCRIPTIONS AND SPECIFICATIONS

The product information in this publication was correct at the time of going to print. However, Ford's policy is one of continuous product development. The right is reserved to change specifications and colours of the models and items illustrated and described in this publication at any time. For the latest details always consult your Ford Dealer. Throughout this publication, wherever a feature is described as being an 'Option' or 'Option Fitment/Pack' etc, you should assume that it will be at extra cost to the base vehicle, unless specifically stated to the contrary. All models and colour combinations are subject to availability.

Some images portrayed are of a pre-production model and/or are computer generated, therefore the design/features on the final version of the vehicle may differ in various respects. In addition, some of the features shown on the vehicles may be optional e.g. metallic paint.

Please also note some driver assistance features and safety features described in this publication are designed to function using sensors, whose performance may be affected under certain weather or environmental conditions.
