Love the wheels. Enjoy the drive.

Alloy wheels add an extra dimension to your Ford, and extra pleasure to your driving. Because you know your Ford looks even better than before, with wheels designed to complement its design from every angle.

Made only for Ford

Ford alloy wheels are made only for Ford cars – never for anyone else. That means no compromises, and no “one style fits all” attitude. Just wheels perfectly matched to your Ford’s style and high standards.

Going further

Because our wheels are built specifically for our cars, we know the exact specification they have to meet. Then we design the load-bearing characteristics and safety performance to go above and beyond – and test for strength and durability at every stage – for your complete peace of mind.

Fit, forget and enjoy

Ford alloy wheels fit your Ford – perfectly. No modification needed, and no new or additional fittings* – whatever the wheel or tyre size. That saves on fitting costs and protects your vehicle warranty, which other wheels could invalidate.

*17", 18", and 19" Alloy Wheels require a steering rack limiter which is available from your Ford dealer.

We don't compromise. Neither should you.

We design, build and test our alloy wheels to be the best choice for you and your Ford – with no compromise. With each new wheel created for a particular Ford model, every design is tested against all body styles for quality, safety and – of course – great looks. We build prototypes for a thoroughly static testing and durability resistance, and only then do we at the Ford Proving Ground.

All-round testing.

Every wheel design is tested and tested again to be sure its performance matches its look. The durability testing that takes around four months includes:

ZWARP Biaxial durability test – a laboratory machine test simulating 300,000 km of driving. The wheel is pre-damaged to represent extreme events such as driving over kerbs. Corning fatigue test – puts the wheel through its paces on corners and extreme rough road manoeuvres.

Speed and load testing – testing how the wheel performs at different speeds and with different loads.

Approved by you – several wheels per design must pass every test, before any new alloy wheel is approved. Then it's ready for your approval, too.

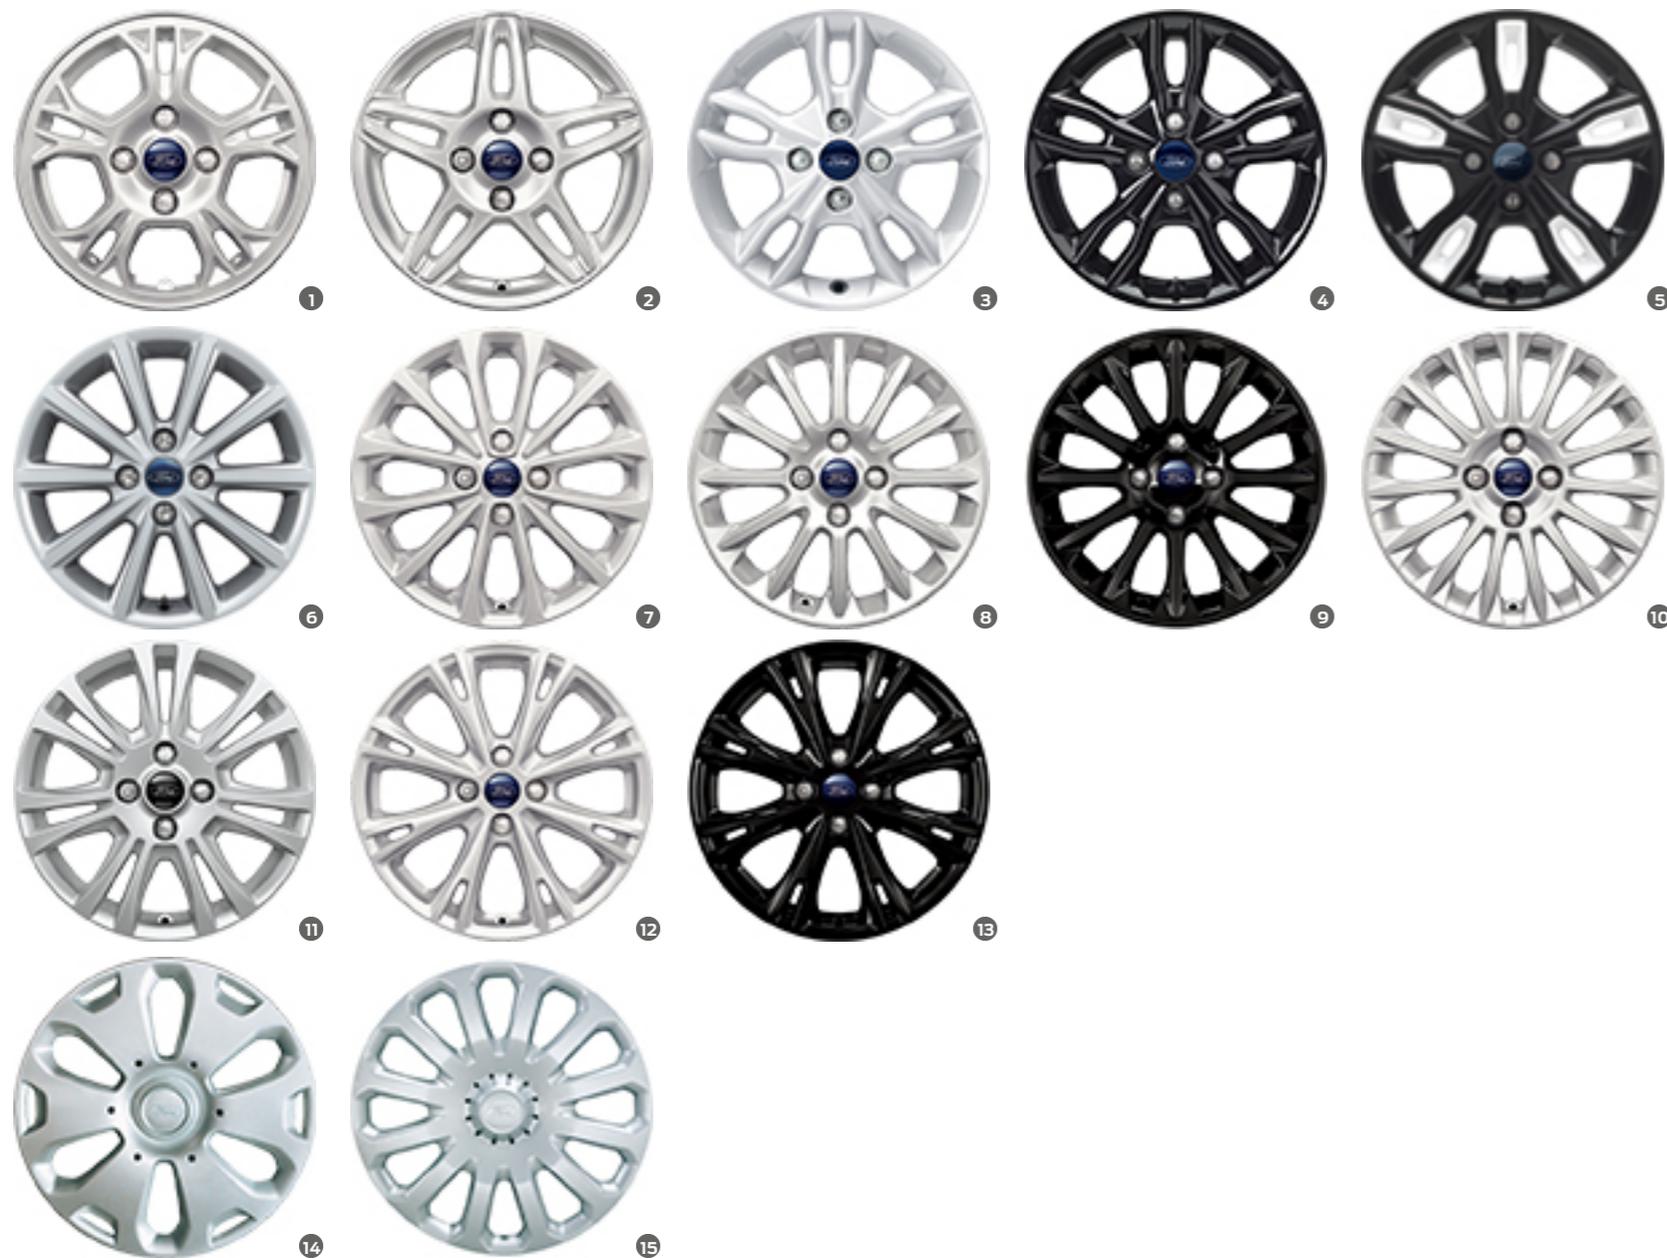

FORD KA from 09/2008

Accessories online

To see your dream wheels mounted on your Ford model and find out more about the wide range of high-quality accessories available take a look at our Online Accessories Catalogue at www.ford-accessories.co.uk.

Browse our online catalogue and find everything you need for your vehicle, including:

- Products supporting your personal lifestyle**, e.g. roof boxes, bike carriers and tow bars.
- Accessories for the eye-catching look** like our stylish body and interior design products.
- 'Must have' technology**, e.g. parking distance control, car docks for Smartphones and multimedia navigation Systems.
- Accessories from established and well-known brands** such as Thule^{®*}, Britax Römer, Pioneer* and many more...

Illustrations, descriptions and specifications. This catalogue was correct at the time of going to print. However, Ford policy is one of continuous product development. The right is reserved to change specifications, colours and prices of the models and items illustrated and described in this publication at any time. For the latest details always consult your Ford Dealer.

Note. This brochure contains both original Ford accessories as well as a range of products from our suppliers. *The identified accessories are carefully selected third party supplier branded accessories which do not come with a Ford warranty but are instead covered by the third party supplier's own warranty, the details of which can be obtained from your Ford Dealer.

When you have finished with this brochure, please recycle it.
